

EPI-1° 

**Novel drugs, chromatin Modulators
from basic Research to human disease**

Dear Colleagues,

we are pleased to announce the first Sapienza one day meeting
“Novel Drugs, chromatin Modulators from basic Research to human disease”
September 25, 2017, at Sapienza University of Rome.

The aim of this day is to bring together researchers interested in epigenetic regulatory mechanisms and novel compounds able to modulate cell behaviour and differentiation.

This research is expanding and can be approached from basic research to more complex systems proposing novel tools in clinical applications and cure of human diseases. The program of the meeting will cover different aspects of this research and is aimed to bring together scientists involved in different fields.
There will be space to present posters for young participants.

The Meeting is supported by a Sapienza meeting grant, Participation is free

Registration deadline August, 25th 2017

E:mail to epi-1chromatinmodulators@uniroma1.it

Please indicate your name, Institution, scientific position, contacts

There will be space for poster presentation of students, PhD and Post-Doc are wellcome to send their poster abstract with registration

We hope to meet many of you and set up a stimulating forum for discussion
